Work Experience

May 2019 – **Lead Software Engineer / Vice President**
Sep 2025 JPMorgan Chase & Co., Seattle, WA

Research and development

- Led a team of 4 in architecting and implementing a dual-region, multi-threaded forensics search solution indexing millions of files with sub-80ms latency
- Reduced workflow execution time by 83% by engineering 4 custom *Kestra* plugins that streamlined authentication and validation, scaling across 12 engineering teams
- Achieved 63% performance improvement than on-premise by delivering multi-tenant Trino on EKS, optimizing SQL workloads for high-confidential data serving AI, ML, and BI teams

SIEM(Splunk) modernization

- Spearheaded public cloud migration of the on-prem *SIEM*, automating infrastructure and backend services to save 2 million dollars annually in the organization's flagship project
- Drove a 30x performance boost and \$1M+ annual savings by optimizing caching and enrichment design within a serverless data processing engine
- Optimized operational processes by over 90% through innovation on a new zero down-time Splunk rehydration framework

Cloud controls testing platform

- Implemented keyword-driven synthetic tests in *Robot Framework* to evaluate the efficacy and reliability of cloud controls detection and remediation
- Packaged and published a custom Python keyword library to the on-prem artifact repository, resulting in 50k+ downloads across multiple teams
- Built Kafka-based pipelines to schedule acceptance tests and stream logs across hybrid cloud environments into a centralized on-prem event collection platform

Personal Project

Event Map, *eventmap.site*

Seattle-focused events visualizer that turns city-wide happenings into actionable map-based insights to help anticipate traffic impact around venues and understand event location, time, and scale at a glance
- Rust (*Actix*, *multi-threading*), PostgreSQL (*PostGIS*), LLM-based geocoding, React, GCP, Nginx

Technical Skills

Languages Python, Rust, Java
Technologies AWS, GCP, Terraform, K8s, Spinnaker, PostgreSQL, DynamoDB, OpenSearch, Trino, DBT

Education

2017 **University of Minnesota**, Minneapolis, MN
Bachelor of Science in Computer Science
